Exide Life Group Loan Suraksha

You have always strived to provide the best for your family. Be it a cozy home for your family, the education at a premier institution for your children, or a comfortable car for your Family, you have stretched that extra bit to advance your family's dreams of tomorrow to today, by taking out a loan.

While all's well that ends well, in the event of an unfortunate death, the same beautiful dreams could turn into a burden of loan repayment for your family.

Exide Life Insurance presents an easy way of protecting your family from this uninvited likelihood with the Exide Life Group Loan Suraksha plan: a single premium insurance plan that covers your life against the loan outstanding. Given the availability of different kinds of loans for your specific needs, the Exide Life Group Loan Suraksha Plan can be customized to fit your protection requirements.

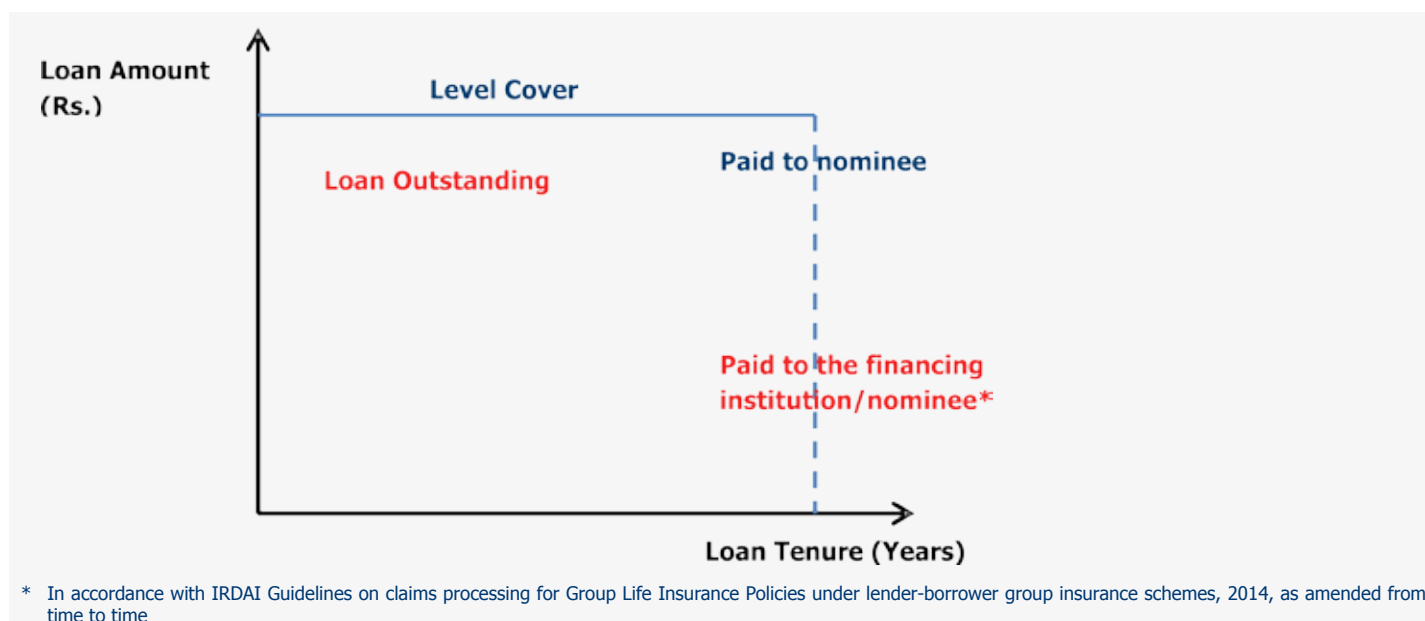

How this plan works / Benefits applicable under this plan

This plan offers two types of coverage options based on the amount of benefit payable on death at any point in time. The death benefit in this plan varies with the options chosen and hence in this plan "Sum Assured on Death" means the amount payable on death as specified in the Certificate of Insurance.

Types of Covers available

Level Cover (For Interest Only Loans): In this cover type, death benefit payable at any point in time would be the original loan amount sanctioned and will remain level throughout the term of the cover. There would be no reduction in the benefit as the loan repayment progresses. In the event of death of the Insured Member, the amount payable shall be as per the original loan schedule guaranteed at the inception of the policy contract irrespective of the actual loan outstanding with the loan provider.

Illustration 1: Level Cover, Single Life

Reducing Cover:

The Reducing Cover option is available with / without the moratorium period in loans which offer the said facility.

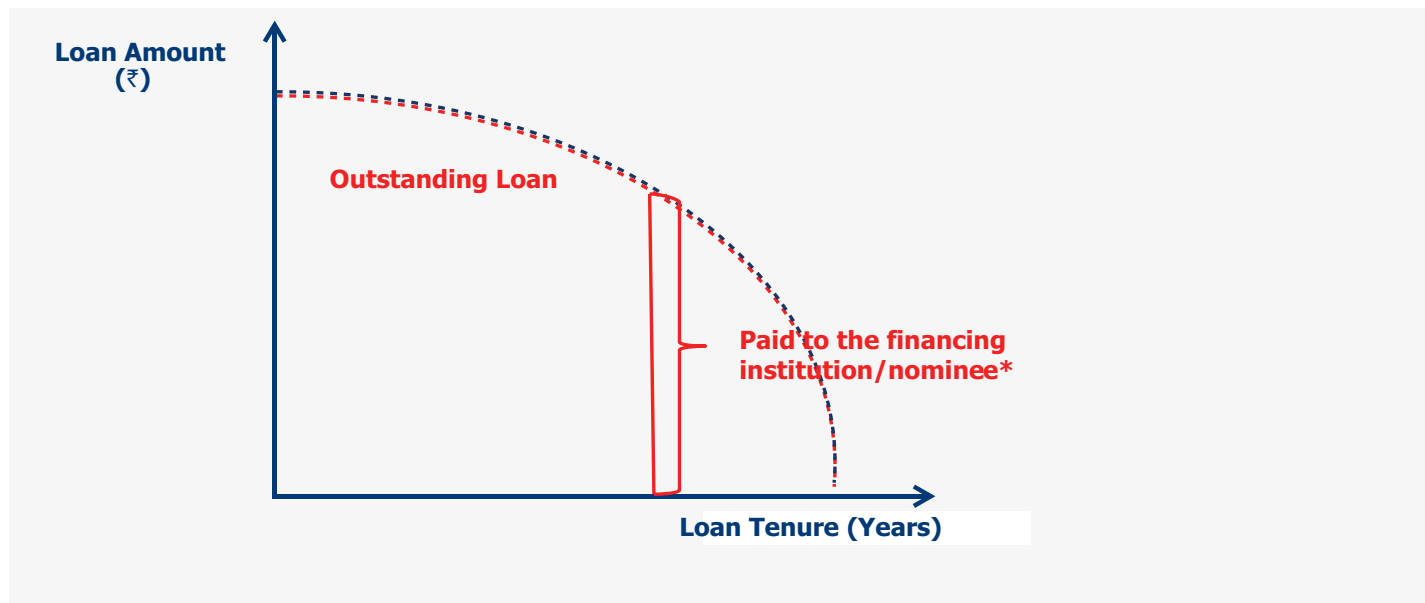

a. During the Moratorium Period: This is the period where there is no repayment towards the loan sanctioned. This is usually available for education loans and housing loans.

The Sum Assured on Death is the sum total of the sanctioned loan amount and the notional interest accrued.

b. After the Moratorium Period: This is the start of the period where the repayment towards the loan sanctioned and disbursed has commenced.

In the event of death of the Insured Member, the amount payable shall be as per the original loan schedule guaranteed at the inception of the policy contract irrespective of the actual loan outstanding with the loan provider..

Additional options in case of loans with co-borrowers as follows:

I. Joint Life Coverage

The Plan also gives you the option of a Joint Life Coverage, in case there are 2 loan-borrowing members. The Insurance Cover would apply on each Insured Member, applicable on a 'first-death' basis. The risk cover on the surviving member ceases once the benefits are paid on the death of the First Life.

On the event of death, the Insurance Cover payable will be as per the type of insurance cover chosen at the start: Level / Reducing Cover.

Illustration 3: Reducing Cover, Joint Life

* In accordance with IRDAI Guidelines on claims processing for Group Life Insurance Policies under lender-borrower group insurance schemes, 2014, as amended from time to time

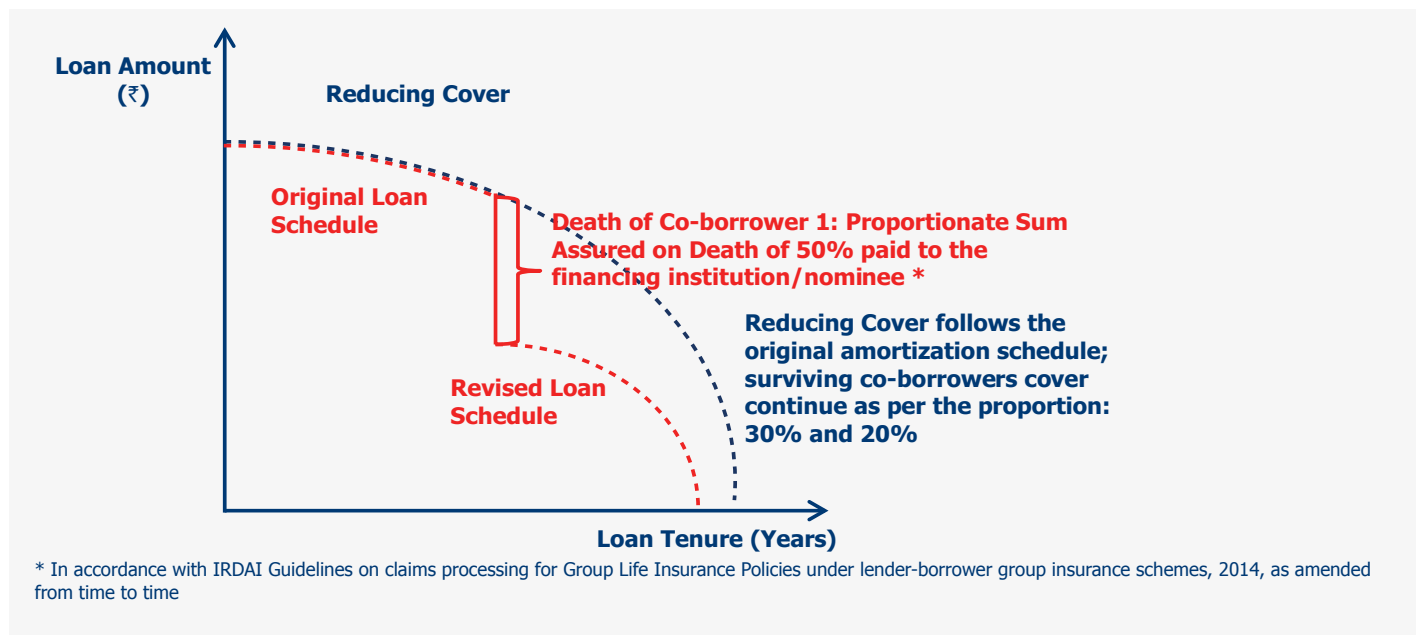

II. Proportionate Coverage

We understand that there can be instances where in order to obtain a higher amount of loan, more than one guarantor is required / a set of co-borrowers take out a loan for the same purpose. The Plan provides an Insurance Cover for multiple co-borrowers towards the loan proportionate to the individual co-borrower's proportion. The upper limit of number of co-borrowers would be subject to the Board approved Underwriting Policy of the Company. In case of death of any of the co-borrowers, the pro-rata insurance cover on the remaining/surviving co-borrowers continues.

Each of the insured members will be covered for his/her share of the benefit schedule. In case of death of any of the insured members, the death benefit paid will be his/her share of the Sum Assured on Death. The loan outstanding would be adjusted to the extent of this proportionate amount.

The surviving co-borrowers would continue to be covered for their proportionate coverage of the Sum Assured on Death.

Illustration 4: Reducing Cover, Proportionate Cover, Co-borrower proportion 1: 50%, Co-borrower proportion 2: 30%; Co-borrower proportion 3: 20%

General Conditions

- The coverage chosen can be a Level Cover / Reducing Cover; Single Life / Joint Life / Proportionate Coverage.
- The type of Insurance Cover once chosen at inception would remain unchanged throughout the Policy Term.
- The Sum Assured on Death at inception cannot be lesser than the loan amount sanctioned. In the case of a moratorium period, the Sum Assured on Death cannot be lesser than the sanctioned loan amount and the notional interest accrued during the moratorium period.
- The coverage term chosen at inception cannot be greater than the loan tenure, except in the following cases,
 - ✓ In case of a loan foreclosure and the Insured Member opting to continue with the Cover.
 - ✓ In case the loan tenure is not a whole number the coverage period will be rounded up to the higher whole number.
 - ✓ Similarly, in case the moratorium period is not a whole number, the moratorium period provided in the coverage period will be rounded up to the next higher whole number and hence the coverage term becomes greater than loan tenure.
- The total period of coverage under this product will always be in whole numbers. In ensuring this, any change made in the coverage term and/or moratorium period will be such that the coverage period will not be more than loan tenure plus 11 months.
- The interest rate p.a. used for the purpose of providing cover as per the amortization schedule in the COI will be in multiples of 100 basis points(bps). In case the actual loan interest rate p.a. is not a multiple of 100 bps, the amortization schedule will be drawn on interest rate rounded up to next higher multiple of 100 bps
